## INFRASTRUCTURE AND PATIENT CARE

### DEPARTMENT OF PERIODONTICS

The Department of Periodontics, M.R. Ambedkar Dental College and Hospital, is equipped with excellent infrastructure solely concerned with superior patient care and well-being with a sustainable healthcare system. The department is laden with several fully-functional dental chairs which enables us to treat multiple patients at the same time.

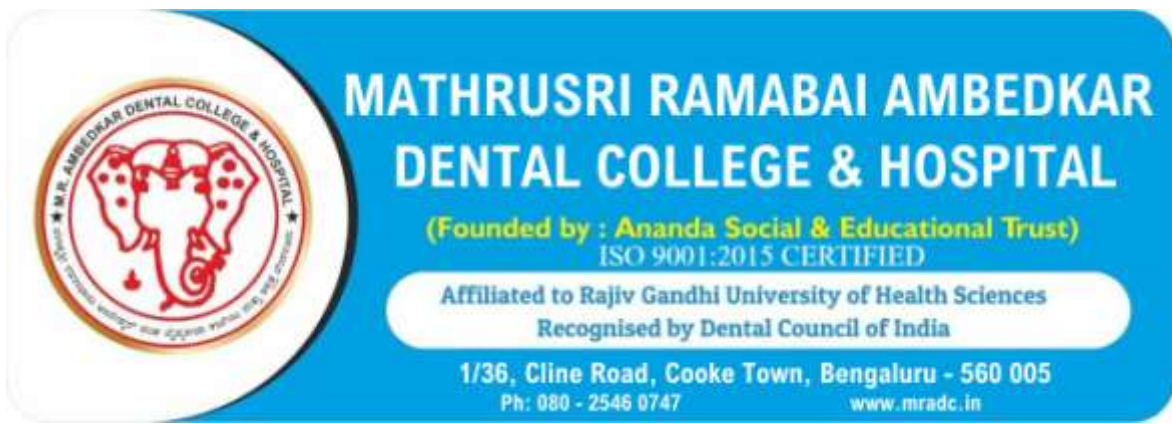

Critical importance is given to sterilization of instruments, equipment and even the dental chambers for which Autoclave Sterilizing System, Dental UV Chamber, HEPA Filters and several chemical disinfection solutions are used in the department.

The department OPD is facilitated by an ample set of diagnostic instruments containing mouth mirrors, explorers, probes etc. Examination and Surgical Gloves of different sizes, Disposable Syringes, Mouth Masks, Protective Head Caps are also provided.

All the required surgical instruments including Curettes, Knives, BPHandles and Blades, Scissors, Suture Materials, Bone Mills and Rongeurs etc. are stocked in the department. Needle Holders, Cotton Holders, Tweezers, Kidney Trays, Glasses, Bowls, Dappen dish, Test Tubes, Suction Tips, Glass Slides etc. are also present. Hand scalers and power-driven scalers are kept in bulk for providing oral prophylaxis. There is no scarcity even in treatment materials such as different bone graft materials, membranes for regenerative procedures, periodontal dressing materials etc.

  
PRINCIPAL  
M.R. Ambedkar Dental College & Hospital  
Bengaluru - 560 005

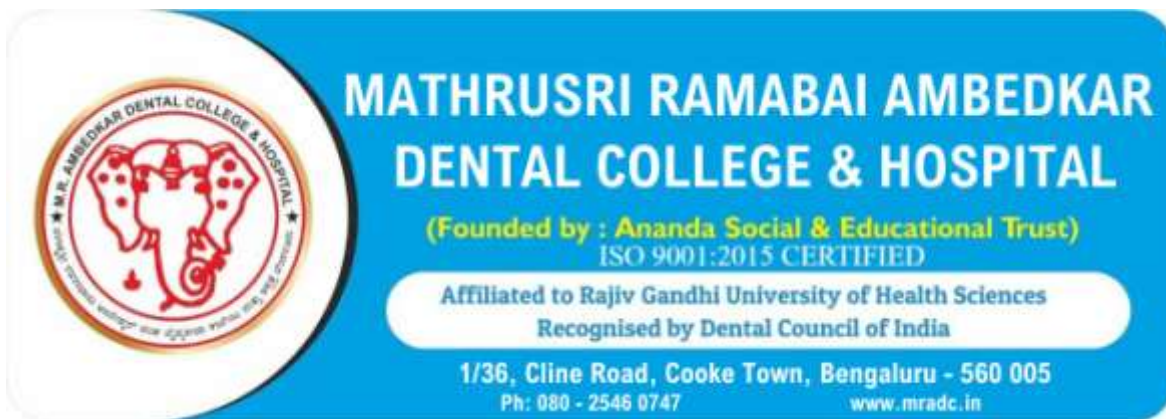

The Department is equipped with a PRF Machine, a pair of Dental Loupes along with a Laser Unit and Electrocautery Kit to facilitate treatment of patients in more advanced ways.

The Department gives indispensable importance towards patient care and treatment. Each patient stepping into the department is provided with undivided attention towards their concerns and problems. As soon as they arrive, they are called into the OPD section where their chief complaints and brief history are noted down. Considering their diagnosis after proper investigations, they are divided into non-surgical or surgical treatment cases. Simple treatment cases which can be treated with oral prophylaxis alone are allotted to Final Year Under-Graduates and House Surgeons. Patients requiring scaling and root planing are given to First Year PG Students whereas those patients needing further surgical interventions like Flap Surgeries, Regenerative Procedures, Implants etc. are either allotted to Second Year or Third Year PG Students. Patients who are medically compromised and require special care are treated by PG Students under the thorough guidance of Senior Staff. All cases, regardless of the condition, are scrutinized by Staffs throughout their treatment procedures.

## DEPARTMENT OF CONSERVATIVE DENTISTRY AND ENDODONTICS

This is most sought out department by general patients in dentistry for getting their teeth restoration, RCT and esthetic correction.

The department of conservative and endodontics can be divided into 4 sections based on the type of treatment being done:

- Conservative dentistry
- Endodontics
- Aesthetic dentistry
- Micro endodontics

Conservative dentistry deals with the study, diagnosis and integrated management of diseases of the teeth.

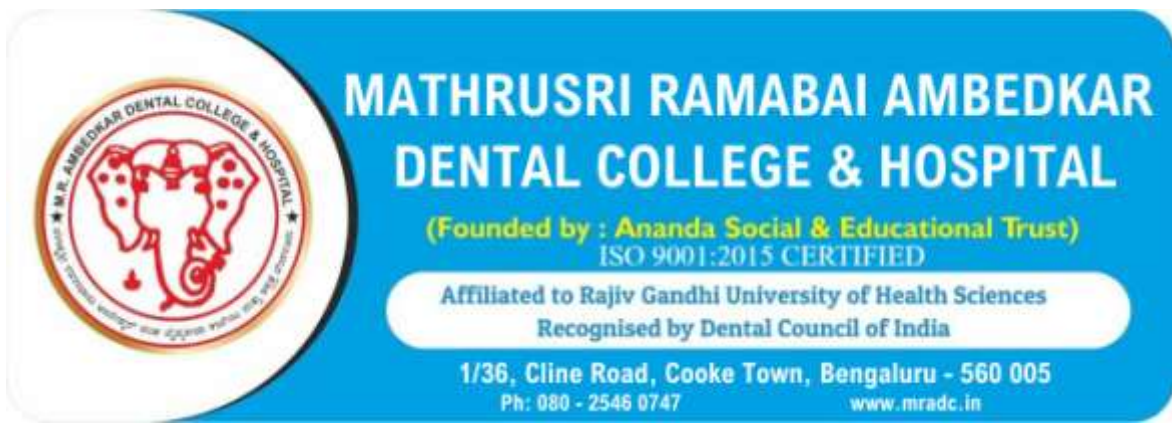

Endodontics deals with diseases and injuries of enamel, dentine and the dental pulp (involve root canal treatment and post and core whenever required).

Esthetic dentistry is a branch of conservative dentistry which deals with the correction of dental anomalies like spacing between the teeth, malformed tooth (smile designing), tooth discoloration (bleaching) which leads to enhanced confidence of the patient within oneself which gives them social confidence.

Micro-dentistry is the most advanced branch of conservative dentistry and endodontics which involves the use of microscope to study the intricate structures of the tooth which helps in better diagnosis and treatment planning leading to successful outcome of the treatment.

Advantages of microscopic endodontics involves the identification of missed canals, retrieval of separated instrument in the root canal, identification of micro

## DEPARTMENT OF ORAL PATHOLOGY AND MICROBIOLOGY

Teaching learning: The department facilitates with various high-end equipment required for teaching process, patient care as well as research.

For undergraduate teaching:

- Microscopes for undergraduates (Total 91, 74 monocular, 17 binocular). These are used for focusing normal dental histological slides and pathological slides of teeth and diseases for the students.
- OHP Projectors - As an audio-visual aid for viewing of a small document or images/pictures.
- LCD Projectors with screen- For power point presentation and images.
- Museum to show tooth and pathological specimens, casts and models for the students

For post graduate teaching:

- With above mentioned facilities, the department is well equipped with Penta head research microscope so that it enables teaching and observing the slides simultaneously for the better understanding of the subject for the students by the faculty.

- Stereomicroscope Helpful tool for research purposes.

- Research microscope facilities Polarising microscope, phase contrast microscope, fluorescent microscope with image analysis software for capturing photomicrographs of histopathological slides for use in case presentation/paper/poster presentation/publications.

- Immunohistochemical lab Immunohistochemical analysis

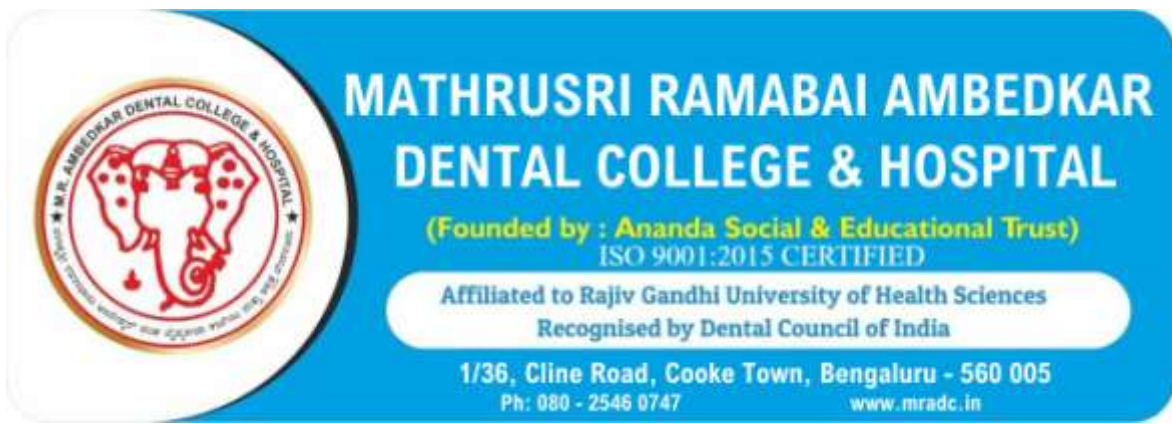

P.R.P.

- Deep freezerserves as an aid for storing samples for research projects.

#### Patient care-

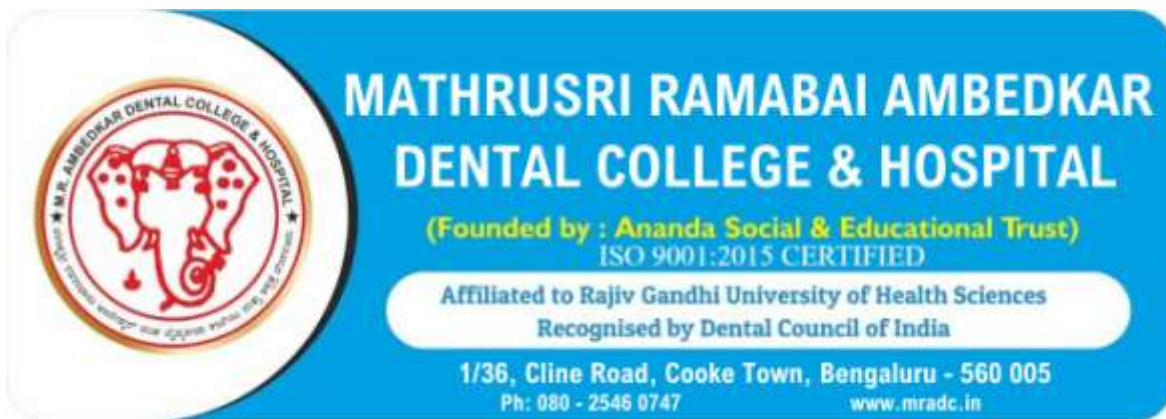

They provide several services which includes routine blood sugar, complete blood count, bleeding time, clotting time. Blood grouping HBsAg, HIV, RFT, Hb, ESR, histopathologic interpretation and diagnosis of cytological smears and biopsies for lesion in oral and para oral structures using routine and special stains.

Overall, this department is spread across 2500 sq. ft with 5 dental chairs, haemtology lab measuring 350 sq. ft with Dental anatomy and dental histology lab measuring 2300 sq. ft.

## DEPARTMENT OF PROSTHODONTICS

The department of Prosthodontics offers rehabilitation of clinical conditions associated with missing or deficient teeth and/or contiguous maxillofacial tissues. Apart from the conventional treatment modalities like fixed, removable and implant prostheses, they provide specialized treatment procedures like implant supported prostheses, restoration of defects of the face and neck with maxillofacial reconstructive prostheses, treatment of temporomandibular joint disorders and the fabrication of adjunct prostheses like radiation protection stents. The Department of Prosthodontics aims to conduct high quality dental education programs at undergraduate and postgraduate level to help foster acquisition of knowledge in clinical science and research.

Equipped with an advanced implant clinic, geriatric clinic, a state-of-the-art ceramic casting lab and the advantage of adequate patient in flow, the department facilitates the provision of comprehensive and specialized oral health care across all socio-economic groups and creates an ideal platform for teaching, learning, demonstration and clinical practice. For the education of undergraduate students, the department is equipped with the required paraphernalia including heavy duty lathes and polishers, micro motors for fine work, Ney, Jelenko and William surveyors, dewaxing machines and acrylisers. The undergraduate laboratory with a capacity of 100 students has been equipped to train them in Pre-clinical Prosthodontics in the first and second year of their course. The department also provides a stereomicroscope to facilitate detailed clinical and laboratory work and to encourage research activities. The department of Prosthodontics provides updated dental chairs, semi adjustable articulator (Hanau, SAM, Dentatus) for the post graduate education in order to practice specialized treatments like balanced occlusion and full mouth rehabilitations.

The department library is stocked with adequate reading material including textbooks, journals and dissertations which can be issued to the students for the purpose of reference and research. A seminar room with audio visual aids is available for seminar presentations, discussions and journal clubs as prescribed by the RGUHS/ DCI curriculum and for demonstrations and extra hours and discussions conducted for slow learners. A well-equipped laboratory with a separate plaster section, metal casting section and ceramic laboratory is present in the department. There are skilled technicians available during college hours for added support and quick processing of crowns and dentures. The faculty provide demonstration of metal casting and ceramic building in the laboratory for undergraduate students to enable easier understanding. The department also organizes Professional Enrichment Programs, workshops and conducts research activities in order to keep the faculty as well as students abreast with the latest advancements and innovations in Prosthodontics and Implantology. As a part of community service, the Department treats patients under the Dantabhagya scheme, in the college, in selected government hospitals and rural health centers for the geriatric population. Various treatments in remote locations are carried out by the post graduate students with the support of undergraduate students, under the supervision of faculty.

## DEPARTMENT OF ORAL MEDICINE AND RADIOLOGY

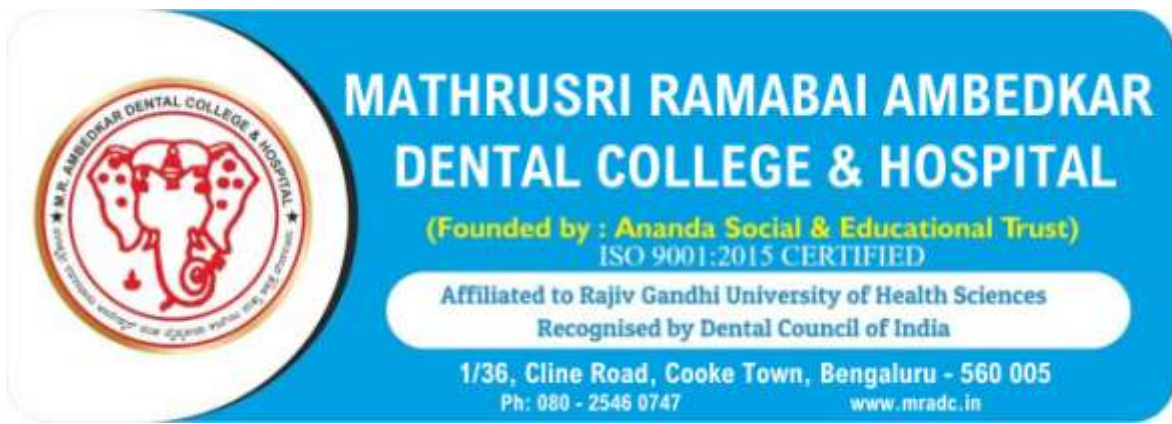

The clinical section in the Department of Oral Medicine is equipped to examine patients for various oral diseases. Patients with deleterious habits are counselled, educated, and motivated to discontinue the same. Apart from the commonly occurring dental caries, pulp and periapical diseases and periodontal diseases, many cases of potentially malignant disorders, oral cancer, orofacial pain, TMJ disorders, salivary gland disorders, developmental anomalies, maxillofacial trauma etc. are diagnosed and medically managed in the department. Special care is taken for patients with systemic diseases by referring them for relevant investigations and to the concerned physician/specialist for opinion and consent for various dental procedures. The Department also runs an Orofacial Pain Clinic and a Forensic Dentistry Research Center. Cases are followed up at regular intervals to assess patient's response to treatment. A seminar room equipped with audio-visual aids for academic discussions and an up-to-date department library is attached to the department.

The Oral and Maxillofacial Radiology section is well equipped with intraoral x-ray machines and extra-oral x-ray machines. There is provision for both manual and automatic processing.

The Digital Imaging section has Intra oral Vista Scan, Radiovisiography system RVG Kodak 5000, Extra oral Kodak 8000C, Carestream 8100C, Digital Panoramic and Cephalometric system with Laser imager and a recently added CBCT machine. These machines are extensively used for diagnosis, treatment planning and research projects by postgraduates and staff of the institution.

## ORAL AND MAXILLOFACIAL SURGERY

Introduction: Oral and Maxillofacial Surgery is a specialty of dentistry that deals with Diagnosis and Management of Diseases of Oral and Maxillofacial region (The Face, Jaw and Neck areas). An Oral and Maxillofacial Surgeon specializes in the Identification and Clinical diagnosis of the diseases pertaining to the head and Neck region using various radiological and laboratory investigations. The Department has contributed in imparting theoretical and practical knowledge to the Undergraduates and Postgraduates in the field of Oral Anatomy, Exodontia, Minor Oral surgical procedures, Facial trauma, Head and Neck pathologies, Dental implants and Orthognathic surgeries (Facial cosmetic surgery). There is also an operating room under general anesthesia where various procedures are done. The Department faculties who are involved in teaching, guiding and mentoring students use various comprehensive teaching aids such as: Videos, charts, Models, Smart boards and Power point presentations. Chair-sided demonstration of various clinical procedures is also given to the students.

The department is also equipped with advanced equipment like –

- Ultrasonic Bone Surgery Unit
- Dental Implant Units – (Includes Physiodispenser, Direct & Indirect Sinus Lift Kits)
- Oscillating Saw System for Orthognathic Surgeries.
- Surgical Diathermy and Cautery Units
- Lab Centrifuge for PRP & PRF preparation

Minor surgical procedures major surgical procedures include:

- Dental Extractions
- Oral Cancer
- Wisdom tooth surgery
- Complex Maxillofacial fractures
- Biopsy
- Orthognathic surgeries
- Dental cysts
- Facial space infections
- Dentoalveolar Fractures
- Temporomandibular Joint disorders
- Dental implants

All the Major surgical procedures are performed in its own Department Operation Theatre under general anesthesia and also in Dr. B R Ambedkar Medical College.

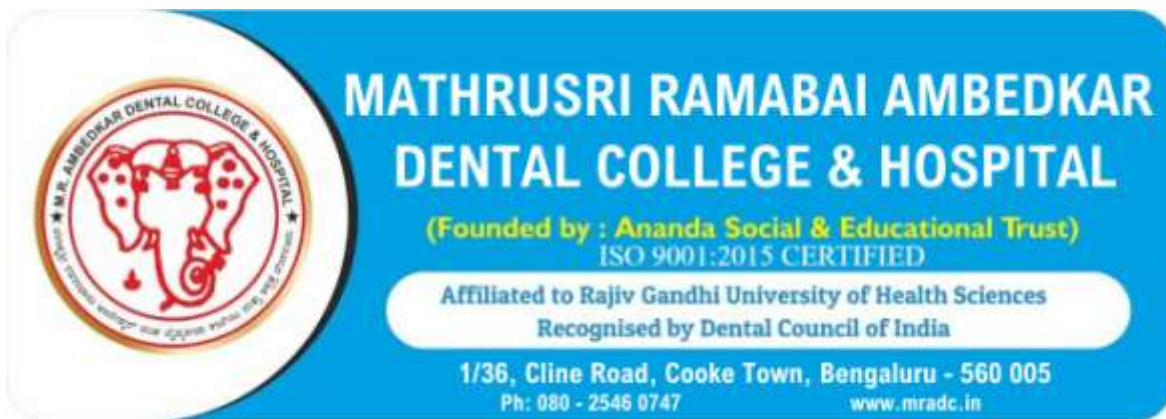

P.R.P. P

## DEPARTMENT OF PUBLIC HEALTH DENTISTRY

Public Health Dentistry is the discipline of dentistry that focuses on prevention of oral disease and promotion of oral health. The clinical section in the department of Public Health Dentistry is equipped to examine and treat patients for various oral diseases.

Dental camps are conducted regularly to screen for any potential oral health risks and treat the patients. Special care is taken for patients with complex dental treatment by referring them for relevant investigations and for various dental procedures. The health education on oral hygiene, maintenance and disease prevention is provided to the beneficiaries in all the outreach programs.

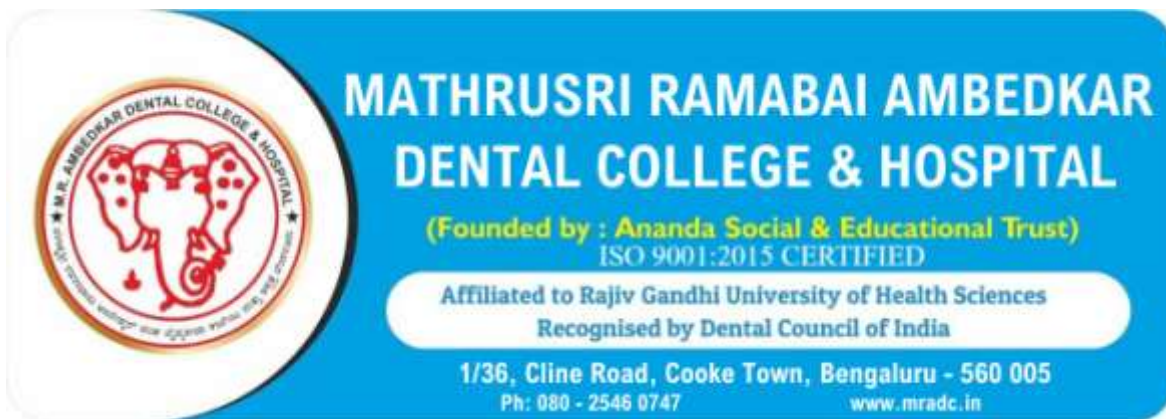

A mobile dental van facility is available along with two portable dental chairs and a portable x-ray machine which are used for the outreach programs. Preventive procedures such as pit and fissure sealants, atraumatic restorative treatments, preventive resin restorations and topical fluoride applications are done.

The satellite centers attached to our department are located at Kodigehalli, Rural health training centre (RHTC) Halasuru, Kanakapura Taluk, AMC Unit, RK Mutt, Spastic Society of Karnataka and Doddamaralwadi. Special children are treated at Spastic Society and for any complex treatment, they are referred to the hospital.

The department has a Tobacco Cessation Centre (TCC) where patients with deleterious habits such as smoking, pan chewing, alcohol etc. are counseled, educated, and motivated to discontinue the same.

The TCC unit has a carbon monoxide breath analyzer to check the carbon monoxide levels in the patients and to monitor the status in the process of their

counseling to quit the deleterious habit. The patients are followed up at regular intervals to assess patient's response.

#### DEPARTMENT OF PEDODONTICS AND PREVENTIVE DENTISTRY

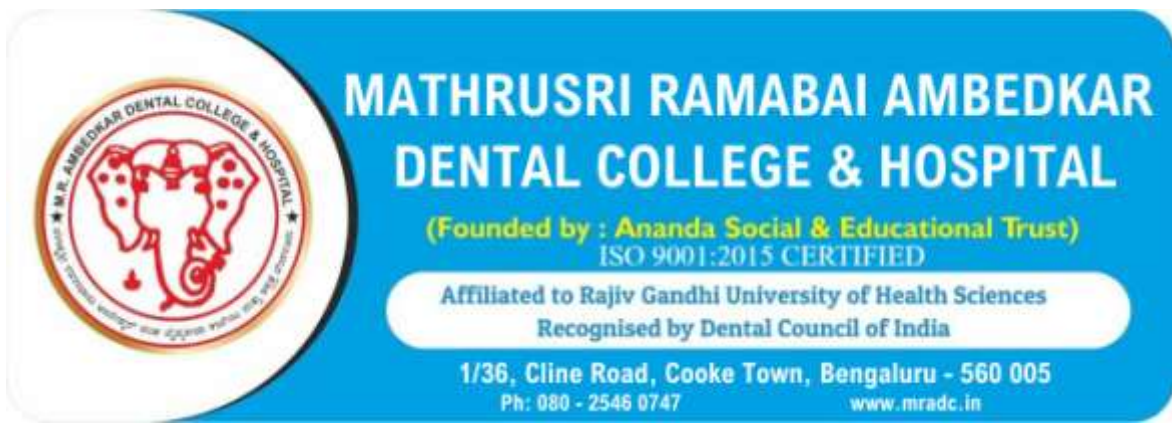

Department of Pedodontics and Preventive Dentistry treats children up to the age of 13 years including special children. The Department is accessible by wheel chair and stretcher using the elevator. Pediatric dental chairs are incorporated for better comfort. A colorful play area with toys and games and a television screen keeps the environment lively.

Patients can be treated under local anesthesia, conscious sedation and general anesthesia depending on their comfort and requirement. Nitrous oxide sedation and general anesthesia is done under the strict supervision of an anesthetist in the department or in the operation theatre in M R Ambedkar Dental College/ B R Ambedkar Medical College and Hospital.

Apart from the standard; special instruments and equipment include front loading sterilizer, ultrasonic cleaner, portable intra oral camera, digital radiovisiography, automatic developer and fixer unit, portable aerotar unit, hydrosolder, TENS, pressure moulding machine for mouthguards, thermoplastized GP, Diode Soft tissue Laser Unit, Electrocautery, Surgical loupes etc. to facilitate easy treatment delivery are used.

A wet lab for under and post graduates equipped with a plaster dispenser, vibrator, model trimmers and heavy duty micromotor are present for preclinical work. A radiograph tracing table, seminar room and library keep the student abreast in the subject. A museum with fixed and removable appliances is displayed and a counseling room is present that helps the patients understand the importance of oral care.

The department also conducts regular dental camps to reach and treat underprivileged children.

P.R.P. P

PRINCIPAL

## DEPARTMENT OF ORTHODONTICS AND DENTOFACIAL ORTHOPAEDICS

The Department has great patient inflow giving the Post Graduate students an Opportunity to expand their clinical knowledge and experience by using various modalities of treatment.

The Department provides various treatments ranging from Growth modulation using Myofunctional and Orthopaedic appliances, Fixed functional appliances like AdvanSync, Powerscope, Forsus and other appliances fabricated in the well-equipped lab of the Department; Fixed Orthodontic therapy using the most advanced techniques in MBT, Self-ligation (DAMON system) with an option to choose between metal and ceramic brackets. Aesthetically appealing Orthodontic treatment such as Lingual Orthodontics and Clear aligners are also offered to the patients.

Temporary Anchorage Device are placed when needed to treat patients. Surgical Orthodontic procedures are also performed. Other facilities include

- Nemoceph software for Cephalogram, planning Orthognathic surgeries.
- Biostar for ESSIX retainers, to treat TMJ dysfunction and bruxism.
- Hydro solder used for Soldering various appliances.

The Department strives to live up to its motto of “Shaping minds, sculpting smiles.”

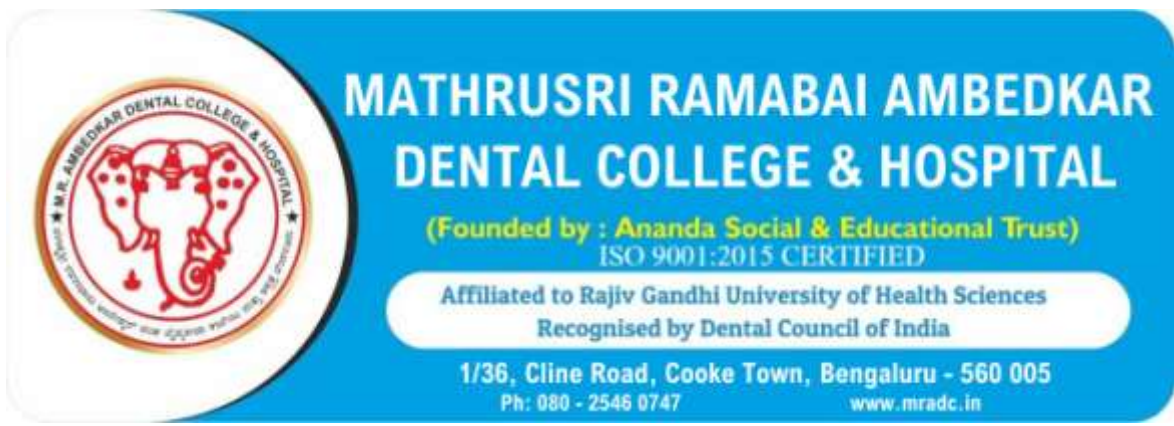

In addition, all departments have a seminar room equipped with audio-visual aids for academic discussions and a well-stocked up-to-date department library that offer specialty-based material to upskill students both clinically and academically.

### LIBSYS 10 Library Management System

The present times demand Library Management System to deliver much more than operational efficiency. It needs to create appreciable staff satisfaction and a delightful experience for the patrons every time they interact with the system. LIBSYS is committed to delivering value to the libraries through its products. In-depth understanding of library operations, implicit needs of the patrons, and dedicated R&D efforts have guided us to deliver high-quality products that have found wide acceptance in the market space.

The new Web-based Library Management System 'LIBSYS 10' provides a greatly enhanced user experience through value-added features and services. LIBSYS 10 is built on international standards and open technologies, i.e. JAVA. It covers Acquisition, Cataloguing, Circulation, Serials, Articles Indexing, E-Books, Digs and Vendor Portal, along with an enriched OPAC.
