Field visit to water treatment plant Report

Introduction:

Public health dentistry department of M.R. Ambedkar dental college and hospital organised a field visit to water treatment plant, at Torakadanahalli.

Final year and interns joined the visit under the guidance of Dr. Umashankar and Dr. Mahadev.

Mr. Srinivas explained about the structure and working of the water purification plant and offered us to visit the concerned area.

We travelled 90km away from our college to understand about the purification methods.

Water treatment is done by using raw water i.e., Cauvery water from the river is treated in process to make the water acceptable for a desired end use.

Water treatment is done to remove contaminated in the water.

The process involved in treating water is solids separation using physical and chemical process such as-

- Aeration to eliminate unneeded dissolved gases such as CO₂, H₂S, NH₃.
- Coagulation is the removal of turbidity from water.
- Turbidity is cloudy appearance of water caused by small particles suspended therein.
- Flocculation is a mixing process
- Sedimentation is to remove suspended materials from water by gravity
- Filtration is to remove suspended materials from water by passing water through medium such as sand.
- Disinfection is to destroy pathogens
- Water distribution is to satisfy the water requirements for combination of domestic, commercial, industrial and fire-fighting purposes.

After water passes/flowing through all distinction features, it's collected into water tank and ready to be supply to houses area.

1/36, Cline Road, Cooke Town, Bengaluru - 560 005
Ph: 080 - 2546 0747 www.mradc.in

Water treatment process:

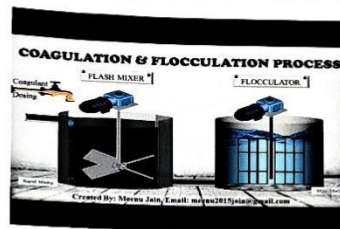

1. Collection: The raw water which is supplied to the water treatment plant comes from Cauvery River.

2. Coagulation: The raw is first treated with chemical coagulant alum. The dose of alum varies depending upon the turbidity colour, temperature and pH of the water.

Professor & H.O.D.
Department of Public Health Dentistry
M.R. Ambedkar Dental College & Hospital
Bangalore-560005

3. flash mixing: Treated water is then subjected to violent agitation in mixing chamber for a few minutes. This allows quick and rapid dissemination of alum throughout the bulk of the water.

4. Flocculation: This phase involves a slow and gentle stirring in a flocculation chamber. The mechanized type of rotor is used. This causes the formation of thick copious white flocculent precipitate. The thicker the precipitate is, the higher is the settling velocity.

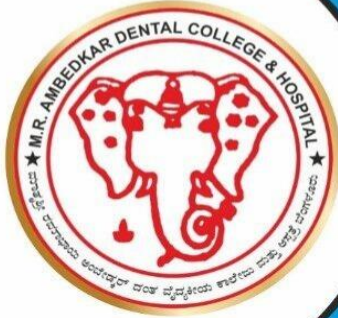

5. Sedimentation:
 - The coagulated water is now lead into sedimentation tank where it is detained for 2-6 hours when the flocculent together with impurities and bacteria settle down in the tank.
 - At least 95% of the flocculent needs to be removed from the water before it is admitted to the rapid filters.

Professor & H.O.D.

MATHRUSRI RAMABAI AMBEDKAR DENTAL COLLEGE & HOSPITAL

(Founded by : Ananda Social & Educational Trust)
ISO 9001:2015 CERTIFIED

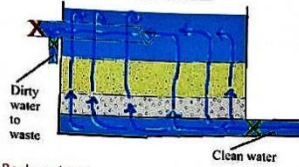

Affiliated to Rajiv Gandhi University of Health Sciences
Recognised by Dental Council of India

1/36, Cline Road, Cooke Town, Bengaluru - 560 005
Ph: 080 - 2546 0747 www.mradc.in

6. Filtration:

- Each filter unit has 6 sand beds – coarse pebble, fine pebble, coarse gravel, fine gravel, coarse sand, fine sand.
- The thickness of sand bed is 110cm.
- The under drains at the bottom of the filter bed collects the filter water.
- Sand filters getting dirty and beginning to lose efficiency approaching 7-8 feet needing, backwashing.

Backwash

7. Backwashing:

- As filter proceeds, the suspended impurities and bacteria clog the filters.
- The filter soon become dirty and begins to lose their efficiency and are subjected to backwashing.
- This is done by reversing the flow of water through the sand bed.
- Washing is stopped when clean sand is visible and the wash water is sufficiently clean.
- It takes about 15 minutes.

8. Disinfection:

- This is the last step before storage and distribution of this water.
- The process used is chlorination.
- The chlorine gas is used for effective disinfection.

M.R. Ambedkar Dental College & Hospital
Bangalore-560005

Conclusion:

Water plays a very important role in human life, whether for daily routine purpose or human health. This field visit gave a knowledge about the purification of water on large scale and made us aware about the quality of water. This also helps us to realise that it not easy to supply water directly from the main supply to the people. We thanks to those workers who invested in this project to ensure the health of the people.

Respected Madam,

We hereby inform that a team from your esteemed institution visited our plant on 21st & 22nd July 2022. As per their curriculum requirement. The operating staff explained the procedure of water purification procedure. We encourage their interest and participation and express our regards to the M.R. Ambedkar Dental college authorities for a well organized and successful visit.

CIRCULAR IQAC INITIATIVE

The Department of Public Health Dentistry has arranged a Field Work for the Interns of our institution as detailed below:

Visit to:

- 1) Water Treatment Plant at T.K Halli, Kanakapura on 21/07/2022 & 22/07/2022.
- 2) Sewage Treatment Plant at Hebbal, Bengaluru on 26/07/2022 & 27/07/2022.

The HODs / Professors / Staff In-charge are hereby informed to permit the Interns to attend the Field Work on the scheduled dates (Copy of the list is enclosed for information).

Bangalore - 560005

Sir,

Sub: Permission for visit to Yelahanka STP.

With reference to the above, as per your request made permission is hereby accorded to 100 students 2 staffs of your Institute on below mentioned schedule to visit Hebbal STP.

Batch	Details of students	Date of Visit
Batch-1	Sl.No.1-51	26.07.2022 10:00AM to 1:00PM
Batch-2	Sl.No.01-49	26.07.2022 2:00PM to 5:00PM

This approval is given subject to the following conditions:

- The entire team should visit the plant with the directions of the concerned Assistant Engineer of the Board who will be present at the plant site.
- Photography is prohibited in the treatment plant and BWSSB premises.
- No recreational/cultural activities will be entertained in the Vicinity of plant premises.
- Faculty/representative of Institution will be held responsible for the safety of the students.
- Visitors/students are prohibited to enter the restricted area in the plants. If violated Board will not be responsible for any kind of loss/damages to the visitors/students.

In addition you are requested to deposit Rs.510/- (Rupees Five hundred Ten only) at Assistant Controller (AC accounts), 1st floor, BWSSB, Cauvery Bhavan, K.G.Road, Bangalore-560009 before the visit.

For further queries please contact O/o Assistant Executive Engineer (STP) - HV (Mo:-9901259632)

Thanking you,

Yours faithfully,

FIELD VISIT TO SEWAGE TREATMENT PLANT

TO WHOMSOEVER IT MAY CONCERN

A team from M R Ambedkar dental college and hospital, Bengaluru visited the Sewage treatment plant at Yelahanka on 26.07.2022 as per their curriculum requirement with the aim of understanding how the plant worked and to have a general understanding about the steps involved in sewage treatment plant.

The team comprised of staff, interns and undergraduate BDS students. We would like to extend our appreciation for the cooperation from the team throughout the visit.

We encourage their interest and participation and express our regards to the M R Ambedkar Dental college authorities for a well organized and successful visit.

To:
The Chief Engineer
BWSSB, Cauvery Bhavan
Bengaluru.

Respected Sir / Madam,
Sub: Request to permit Staffs and Students to visit Sweage Treatment Plant at Hebbal.

With reference to the above, I kindly request you to permit our staff and students to visit Sweage Treatment Plan at Hebbal, which is a part of curriculum in their academics. The total number of visitors would be fifty per day.

Kindly consider our request and do the needful.
Thanking you,

Yours faithfully

Source of waste water:

- ✓ Human waste
- ✓ Washing water
- ✓ Rainfall collected on roofs, yards, hard-standings
- ✓ Domestic sources
- ✓ Direct ingress of river water
- ✓ Highway drainage
- ✓ Industrial waste.

Waste water treatment procedure:

Sewage treatment generally involves 3 stages, i.e.

- ✓ Primary treatment
- ✓ Secondary treatment
- ✓ Tertiary treatment

Wastewater Treatment Process

Types of the treatment process:

Sr.no	Types of treatment	Types of treatment unit	Name of the unit	Type of impurities removed
1.	Physical treatment	Physical	Screen	Large suspended and floating matter
		physical	Grit chamber	Grit
		physical	Chemical reactors	Slit, sand and other heavier matter
2.	Chemical treatment	Chemical	Chemical reactors	Dissolved chemicals
3.	Biological treatment	Biological	• Trickling filters	Dissolved organic chemicals
			• Activated sludge plant	
			• Rotating biological contractors	
			• Digesters	

Primary treatment:

- Primary treatment removes materials that can be easily collected from the raw sewage before they damage or clog the pumps and sewage lines of primary treatment clarifies trash, tree limbs, leaves, branches etc.
- The settled and floating materials are removed and the remaining liquid may be discharged or subjected to secondary treatment.

Bar screening:

The influent sewage water passes through a bar screen to remove all large objects like cans, rags, stick, plastic packets etc. carried in the sewage stream. This is most commonly done with an automated mechanically raked bar screen in modern plants serving large populations, whilst in smaller or less modern plants a manually cleaned screen may be used.

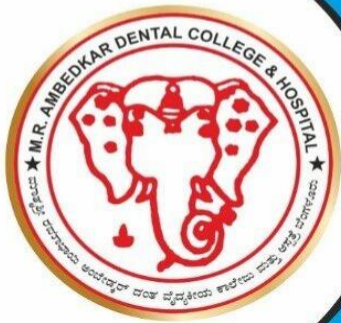

Bar screens

Ph: 080 - 2546 0747 www.mradc.in

Tertiary treatment:

- The purpose of tertiary treatment is to provide a final treatment stage to raise the effluent quality before it is discharged to the receiving environment (sea, river, lake, ground, etc). more than one tertiary treatment process may be used at any treatment plant.
- If disinfection is practiced, it is always the final process. It is also called "effluent polishing."

Filtration:

Sand filtration remove much of the residual suspended matter. Filtration over activated carbon, also called carbon adsorption, removes residual toxins.

Sludge drying beds:

When a liquid sludge is produced, further treatment may be required to make it suitable for final disposal. Typically, sludges are thickened to reduce the volumes transported off-site for disposal. There is no process which completely eliminates the need to dispose of biosolids.

Chlorination:

Chlorination is water treatment that destroys disease-causing bacteria, nuisance bacteria, parasites and other organisms. Chlorination also oxidizes iron, manganese and hydrogen sulphide so they can be filtered out.

Conclusion:

Waste water treatment is an important initiative which has to be taken more seriously for the betterment of the society and our future. Treatment of sewage is vital for the healthy survival of humans, the waste generated should be treated in order protect us and protect the environment.

It is a mammoth task to treat sewage which is very unpleasant to see and smell, so would like to express our gratitude to the hardworking employees and engineers of this plant for doing their jobs and enlightening us about this very important aspect in waste management.

We would also like to thank our teachers of The Department of Public Health Department for giving us this opportunity and helping us understand our subject better.

REPORT OF THE EVENT

Name of the event: Industrial visit

Venue: Malur	Date: 12/08/2022	Time: 12:00pm Duration: 2hrs
Target audience: local public	Programme type: Industrial visit	Staff Incharge: Dr. Mahadev Dr. Chandrakala

Report: Industrial visit

The students of M.R. Ambedkar Dental College & Hospital visited Group Pharma on 12/08/2022, Friday, Malur, Karnataka as a part of Industrial field visit. They were accompanied by Dr. Mahadev, Dr. Chandrakala, Department of Public Health Dentistry and Mr. Ganapathy, Co-ordinator of Group Pharma.

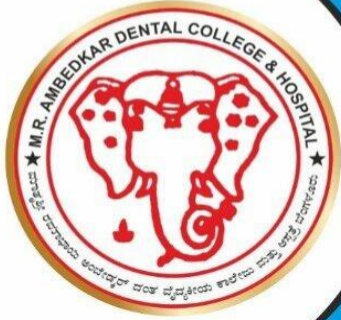

The bus started from College campus at 9:30 am and we reached Group Pharma at 12pm. They were welcomed by the staff and gave presentation on the various infrastructure and products of the company which was followed by Lunch and visit to Manufacturing plant. The day was ended by Photo session and distribution of hamper.

DETAILS OF SHORT TERM STUDY

SL NO	TITLE OF THE PAPER	STAFF/STUDENT
1	Assessment of the Usefulness of Morphometric and Volumetric Analysis of Mastoid Process for Gender Determination in Forensic Odontology: A Retrospective Cone Beam Computed Tomographic Study	Dr. Vaishali M.R. Dr. G Roopashri Dr. Binindita Mondal
2	Tongue Replica for Personal Identification: A Digital Photographic Study	Dr. Vaishali M.R. Dr. C. Sreepadha
3	Gender Determination from measurements of piriform aperture- A Digital Posteroanterior Skull study	Dr. Maria Priscilla David Dr. Sangeetha S Dr. Suganya B
4	Knowledge and Awareness of Oral Health in Adult patients with Diabetes Mellitus : A questionnaire study	Dr. G Roopashri
5	Evaluation of Foramen Magnum in Gender Determination by Using Digital Submentovertex Radiographs.	Dr. Vaishali M.R. Dr. G Roopashri
6	Salivary cotinine test for assessment of tobacco exposure in adolescent population - ongoing.	Dr. Vaishali M.R.
7	Assessment of mental Health status among Dental students during Covid-19 Pandemic	Dr. Sangeetha S Dr. Shrabani
8	Gender Determination from Measurements of Mental Foramen- A Digital panoramic Radiographic Study	Dr. Archana Markande Ms. Shruithi
9	Assessment of cortical integrity as observed on a cone beam CT as a predictor for paresthesia post third molar removal surgeries	Dr. Vaibhav N
10	Comparison of impacted mesioangular with vertically impacted mandibular third molar wound healing after disimpaction with and without combination of platelet-rich fibrin and beta Tricalcium phosphate as grafting material	Dr. Sunil S. P
11	Comparison between OPG and IOPAR for assessment of status of impacted 3rd molars	Dr. Karthik N
12	Comparative study between ridge split and autogenous bone grafting ridge augmentation procedure	Dr. Balraj B.V.
13	Evaluation of personality traits in subjects seeking orthodontic treatment- a cross sectional questionnaire based survey	Dr. Tarulatha
14	Awareness and knowledge about covid 19	Dr. Chaitra K R
15	Treatment of gingival hyperpigmentation using diode laser with and without PRF: a split mouth randomized study	Dr. Hemalatha.M Dr. Miranda Thomas
16	Correlation between gingival biotype and width of keratinized gingiva with the periodontal clinical parameters	Dr. Hemalatha.M Dr. Miranda Thomas
17	3. Incidence of cervical hypersensitivity after periodontal therapy- a retrospective survey	Dr. Hemalatha.M Dr. Miranda Thomas
18	Salivary micro-rna 155,146a/b, 203 as potential diagnostic	Dr. Hemalatha.M

	biomarkers of periodontitis and diabetes	Dr.Miranda Thomas
19	Salivary flow-rate, xerostomia and periodontitis in diabetic patients	Dr.Hemalatha.M Dr.Mithula.M
20	Self-reported oral hygiene status and breath odor in mouth-mask wearers during covid 19 pandemic	Dr.Hemalatha.M Dr.Mithula.M
21	Association between gingival phenotype and periodontal status in patients during orthodontic treatment	Dr.Hemalatha.M Dr.Mithula.M
22	Treatment of gingival hyperpigmentation using Crayosurgerywith and without PRF: a split mouth randomized study	Dr.Hemalatha.M Dr.Mithula.M
23	Cheiloscopy and Rugoscopy as simple, non-invasive diagnostic tools in Periodontitis and Type II Diabetes Mellitus Patients –An Observational Study	Dr. Jayanthi.D Dr.MonamiBujarbaruah
24	Awareness and Knowledge among Patients about Polycystic Ovary Syndrome (PCOS) and its Association with Periodontal Health: A Questionnaire Study	Dr. Jayanthi.D Dr. MonamiBujarbaruah
25	Assessment of awareness among dental studentsOn sports injuries as well as their attitude and Interest towards sports dentistry.	Dr. Jayanthi.D Dr. MonamiBujarbaruah
26	Oral health related quality of life with dental implants: a patient satisfaction analysis”	Dr. Jayanthi.D Dr. MonamiBujarbaruah
27	Correlation between tooth mobility and a novel evidence-based chart in decision making of tooth extraction - a cross sectional study	Dr. FouziaTarannum Dr. Sandhya v
28	Effect of microneedling and platelet rich plasma injection on thickness of gingiva: a comparative study.	Dr. FouziaTarannum Dr. Sandhya v
29	Knowledge, attitude and practices regarding use of over-the-counter available mouthwashes among general Indian population: An epidemiological survey	Dr. FouziaTarannum Dr Kunjana K
30	Effect of position of maxillary labial frenum on periodontal status of adjacent teeth	Dr. FouziaTarannum Dr Kunjana K
31	Artificial intelligence the new tool to identify and classify dental implant system using different radiographic techniques	Dr. Lalith Vivekananda Dr Bhoomika M
32	Knowledge and awareness about peri-implantitis and its treatment among general dental practitioner's and implant specialists – A questionnaire study	Dr. Lalith Vivekananda Dr. Sana Afroz
33	Relationship between total antioxidant capacity and periodontal health in diabetic patients.	Dr. Lalith Vivekananda Dr. Sana Afroz
34	“Association of C reactive protein / albumin ratio in saliva and periodontal status of systemically healthy subjects- A case control study – Ongoing	Dr. Dr Shobha R Mr. Nikhil
35	Effect of Iatrogenic factors on periodontal health- Ongoing	Dr Shobha R Dr sonu
36	Ethical sensitivity of dental students in dental colleges, Bangalore	Dr.Harini Dr Aastha
37	Knowledge, Attitudes and Practices on Use of Personal	Dr.Harini
